What is VBC

- Value-based care is a form of reimbursement that ties payments for care delivery to the quality of care provided and rewards providers for both efficiency and effectiveness.
- As opposed to volume of service provided value-based care models center on patient outcomes and how well healthcare providers can improve quality of care based on specific measures, such as reducing hospital readmissions, using certified health IT, and improving preventative care.

Care Coordination

- Care coordination is identified by the Institute of Medicine as a key strategy that has the potential to improve the effectiveness, safety, and efficiency of the American healthcare system. Well-designed, targeted care coordination that is delivered to the right people can improve outcomes for everyone: patients, providers, and payers.
